Specification	2	3	
Folding handle			
Steel, chrome plated finish	CR		
Stainless steel AISI 303	NI		
Matte shot-blasted finish			

Tray

Zinc die-cast Powder coated

- · Black, RAL 9005, textured finish
- · Silver, RAL 9006, textured finish

RoHS

Folding handles GN 425.8 with recessed tray are used in applications where the handle must not protrude more than 3 mm when in the folded down position.

The recessed tray gives this handle added strength. Folding handle and recessed tray are supplied as a complete assembly.

In type A, the handle is held in both the folded up and folded down position by means of a spring-loaded (spring disks) thrust bolt.

In type B, the handle always springs back to the folded down position after being released, preventing it from protruding at undesirable times.
