Powder coated		
Black, RAL 9005, textured finish		<ul><li>sw</li></ul>
(only in type A and B)		
Folding handle		

## Folding handle

Stainless steel AISI 304 Matte shot-blasted finish

## Retaining springs Spring steel AISI 301

RoHS

Folding handles GN 425.9 are used where the handle must only protrude a short distance in the resting position.

Folding handles identification numbers 1 and 2 are suitable for side "access", as these have a 90° limit stop. If used from above, identification numbers 3 and 4 with a handle that can fold freely through 180° are a better version.

The retaining springs of identification numbers 2 and 4 keep the handle in any position. This keeps the handle in a position that can be easily accessed and prevents noise as a result of vibration in the resting position.

The handle and the retaining springs are secured by mounting the attachment across the entire surface. All components are supplied unassembled.

GN 425.8 Folding Handles with Recessed Tray (Steel / Stainless Steel, with Handle Held or Spring Return)
