Stainless steel		
precision casting AISI 316	A4	
Matte shot-blasted finish		GS
RoHS		

## On request

- · Polished or powder coated version
- · Various metric size fasteners and kit packaging

The ledge handle GN 730.5 is used on doors, guards and hatches on machines, as well as on drawers and pull-out units. Due to the A4 material used, the handle is intended especially for use in corrosive environments with aggressive media.

The ledge handle is made in a way that does not allow pooling of fluids, which makes cleaning easier and prevents build-up of residue and bacteria. It is attached from the back side via the mounting threads. Alternatively, the handle can be welded from the front.
