#### **On request**

• Other colors

Inf	orm	ation

Clamps GN 939 are used to fasten panels of glass, plastic or other materials. Both corner and surface clamps are available, depending on the installation situation.

The panels are clamped between the rubber inserts. In addition, positive locking by means of a securing pin or stop plate can be selected as a type.

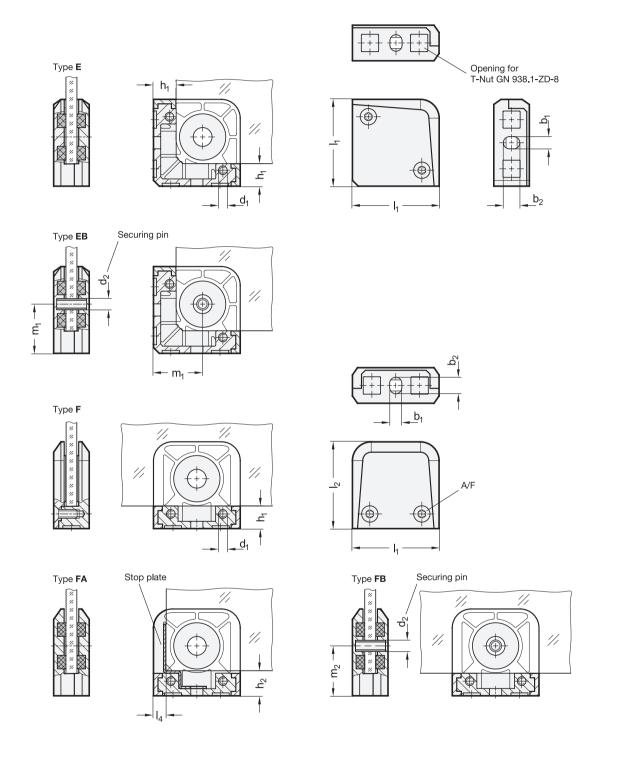

If the clamps are used with profile systems with 8 or 10 mm slots, the T-nuts GN 938.1 are available as mounting accessories. These enable simple alignment, secure the clamps against rotation and counteract possible stresses.
